BIS & IS 17631 Certified Office Chairs

Built for Performance. Tested for Safety. Trusted for Business.

What is BIS?

BIS (Bureau of Indian Standards) is India's national standards authority. BIS certification confirms that a product has been independently tested and verified to meet prescribed quality, safety, and durability benchmarks.

What is IS 17631?

IS 17631 is the Indian Standard specifically defined for Office Chairs. It evaluates chairs on critical performance parameters such as structural strength, stability, load endurance, safety, and ergonomic suitability for professional environments.

Key Parameters Covered Under IS 17631:

- Static & dynamic load testing
- Backrest & armrest strength
- Base stability & tipping resistance
- Durability of moving mechanisms
- Overall safety during regular office usage

Why This Matters for B2B Buyers:

- ✓ Reduced product failure and warranty risk
- ✓ Verified durability for daily commercial use
- ✓ Improved employee comfort & productivity
- ✓ Compliance for corporate & government procurement
- ✓ Confidence of working with certified manufacturing standards

Our Commitment:

Our office chairs are manufactured and tested in compliance with IS 17631 guidelines and BIS quality benchmarks. This ensures consistent performance, safety, and reliability across every unit delivered — making them ideal for corporate offices, institutions, and large-scale deployments.

Choose Certified. Choose Reliability.

When you select BIS & IS 17631 compliant chairs, you invest in long-term value, operational confidence, and professional-grade seating solutions.
